

## mini-Ligno MD/C Moisture Meter

### Description:

The mini-Ligno MD/C is a pin meter calibrated for measuring wood: softwoods, hardwoods and panel products. The moisture range 6-25% is sufficient for any craft type, woodworking even industrial applications. The mini-Ligno MD/C comes with built-in pins and a connector for an assortment of external electrodes and in-kiln cables.

The mini-Ligno M/D/C moisture meter has all essential functions needed for basic meter uses. It is built to the same quality standard as all other Lignomat meters. Accurate, reliable and built-to-last. It is the meter of choice for many hobbyists, woodworkers, cabinetmakers and anybody drying their own lumber.

### Lignomat quality at a great price!

The MD/C delivers consistently accurate measurements for the life-time of the meter. The calibration is internally checked before each measurement and if necessary automatically adjusted. The meter measures down to 6%, low enough for woodworking, furniture making, flooring. The range up to 25% is high enough for home construction, water damage repair and lumber drying even firewood.

When measuring thick lumber with the mini-Ligno MD/C, make a fresh cut and measure the endgrain. If that is not feasible, add the Electrode E12. Pkg: M2-M

For kiln applications add in-kiln cables and probes to measure from outside the kiln without having to enter the kiln. Pkg: M-11

If the built-in pins do not reach deep enough for home and water damage repair, add the electrode E14 with EL pins 7" long. Package M4-PL.

### Features:

- Measuring range for wood 6-25%.
- Corrections for softwood, hardwood and panel products
- Shock-proof, light-emitting, bright LED display, easy to read in poorly lit areas.
- Stable calibration, not affected by ambient temperatures with built-in calibration check.
- Ergonomic design for easy operation, durable and rugged design, built to last.
- Automatic shut off.
- **Pins and built-in connector for external electrodes and in-kiln cables.**
- The mini-Ligno M/DC has a 2-year warranty, display has a life-time warranty, accessories have a 1-year warranty, pins and battery are excluded.

### Specifications:

Size: 5.5"L X 2.75"W X 1"H

Measuring Range for Wood: 6-25%,

Settings: 2 wood groups for softwoods, hardwoods and panel products

Numeric LED display: 6,7,8...25%, virtually unbreakable, life-time warranty.

Calibrated for a wood temp of 70°F (20°C)

A correction table for different wood temperatures is listed in the manual.

### Included:

1 mini-Ligno MD/C meter with wrist strap in carrying pouch with belt loop

1 9V battery

1 laminated wood group card and 1 instruction manual

2 pairs of pins: 1 pair of 3/16" and 1 pair of 7/16" measuring depth (5mm, 10mm)

Built-in connector for an assortment of external electrodes and remote cables

Specifications are subject to change without notice.

Quality, performance and price have made mini-Lignos one of our most popular moisture meters.

Adding depth electrode E12 with insulated pins allows measuring moisture up to 2" deep.

Adding probes and cables allows measuring moisture in the center of the stack without opening the hot kiln.
