

## mini-Ligno MD Moisture Meter

### Description:

The mini-Ligno MD is a pin meter calibrated for measuring wood: softwoods, hardwoods and panel products. The moisture range 6-25% is sufficient for any craft type, woodworking even industrial applications.

The mini-Ligno M/D moisture meter has all essential functions needed for basic meter uses. The meter is built to the same quality standard as all other Lignomat meters. Accurate, reliable and built-to-last. It is the meter of choice for many hobbyists woodworkers, cabinetmakers and anybody drying their own lumber.

Lignomat quality at a great price!

The MD delivers consistently accurate measurements for the life-time of the meter, the calibration is internally checked before each measurement and if necessary automatically adjusted. The meter measures down to 6%, low enough for woodworking, furniture making and flooring. The range up to 25% is high enough for home construction, water damage repair and lumber drying even firewood.

When measuring thick lumber with the mini MD, make a fresh cut and measure the endgrain. If that is not feasible, choose the mini-Ligno MD/C with Electrode E12.

If you want to measure inside a kiln, choose the mini-Ligno MD/C with in-kiln cables, With package M-11, you do not have to go inside the kiln to measure.

If the built-in pins do not reach deep enough for home and water damage repair, we recommend the mini MD/C with electrode E14 with EL pins 7" long. Pkg. M4-PL

### Features:

- Measuring range for wood 6-25%.
- Corrections for softwoods, hardwoods and panel products
- Shock-proof, light-emitting, bright LED display, easy to read in poorly lit areas.
- Stable calibration, not affected by ambient temperatures, built-in calibration check.
- Ergonomic design for easy operation, durable and rugged design, built to last.
- Automatic shut off.
- The mini-Ligno MD has a 2-year warranty, display has a life-time warranty, pins and battery are excluded.

### Specifications:

Size: 5.5"L X 2.75"W X 1"H

Measuring Range for Wood: 6-25%,

Settings: 2 wood groups for softwoods, hardwoods and panel products

Numeric LED display: 6,7,8...25%, virtually unbreakable with life-time warranty.

Calibrated for a wood temp of 70°F (20°C)

A correction table for different wood temperatures is listed in the manual.

### Included:

1 mini-Ligno MD/C meter with wrist strap in carrying pouch with belt loop

1 9V battery

1 laminated wood group card and 1 instruction manual

2 pairs of pins: 1 pair of 3/16" and 1 pair of 7/16" measuring depth (5mm, 10mm)

Built-in connector for an assortment of external electrodes and remote cables

Specifications are subject to change without notice.

Quality, performance and price have made mini-Lignos one of our most popular moisture meters.

It is well worth to use a moisture meter for woodworking projects. Avoid cracked table tops, loose joints and failed glue lines.

Smart design – built tough. Green cap serves as a handle for easy pin insertion and covers pins for safe transportation. Strap keeps meter in reach.
